Here you can find the [menu](#) of Marks And Spencers Cafe in Belfast. At the moment, there are **15** courses and drinks on the card. The M&S Cafe, situated on the upper floors of a department store, is characterized by inconsistency. While some patrons appreciate the good-quality food and efficient service during quieter times, others lament the chaotic experience during peak hours, marked by long queues and uninterested staff. Many guests wish for a more exciting menu, noting several missed opportunities in flavor and presentation, particularly with food items like the elusive chicken hot pot and unappetizing soup options. Despite its clean environment and reputation for freshly baked goods, the overall dining experience is marred by poor customer service and a lack of attention to detail.
